

# POLYFLEX® SA P

## SELF-ADHERED GRANULATED CAP SHEET

### PRODUCT DESCRIPTION

Polyflex SA P membranes are premium, self-adhered plastomeric roofing products, manufactured using patented ADESO® Dual-Compound Self-Adhesive technology, whereby a “true” APP polymer modified asphalt compound is applied on the top layer and an aggressive self-adhesive compound is applied on the bottom layer. Polyflex SA P membranes are built with a high performance reinforced polyester mat to ensure excellent dimensional stability.

Polyflex SA P membranes are finished with granules on the top surface and feature patented FASTLap® for granule free roll ends, as well as SEAllap®, a factory applied adhesive treatment at the membrane overlap. Each of these patented features provide for greater ease of application, as well as improved product performance.

### USES

- Designed for applications where using a propane torch is undesirable or prohibited
- Applications include new construction, re-roofing and BUR repair installation
- As a flashing membrane in all applicable specifications

### FEATURES AND BENEFITS

- Excellent long-term adhesion and application to multiple substrates and base plies
- Exceptional physical properties and long-term weathering performance
- UV stabilized long lasting granule surfacing in multiple colors

### TECHNICAL DESCRIPTION

TEST METHOD	PROPERTY	ASTM VALUE
ASTM D5147	Peak Load @ 23+/-2°C (73.4+/-3.6°F), MD and XMD, min, kN/m (lbf/in.)	8.8 (50)
ASTM D5147	Elongation @ 23+/-2°C (73.4+/-3.6°F), MD and XMD, min (%)	23
ASTM D5147	Tear Strength @ 23+/-2°C (73.4+/-3.6°F), min, N (lbf)	311 (70)
ASTM D5147	Low Temperature Flexibility, max, °C (°F)	0 (32)
ASTM D5147	Granule Embedment, max, g	2
ASTM D1970	Adhesion to Plywood @ 40°F, min, lbf/ft width	2.0
ASTM D1970	Adhesion to Plywood @ 75°F, min, lbf/ft width	12.0
ASTM D1970	Sealability around nail	pass
ASTM D1970	Waterproof integrity after low temp flexibility	pass
ASTM D1970	Waterproof integrity of lap seam	pass

### AVAILABLE COLORS

Top surface granule protection is available in a variety of colors such as:

Black      Buff      Chestnut      Grey Slate      Oak  
 White      Red Blend      Pine Green      Heather Blend      Weatherwood

### PRODUCT DATA

Coverage (Approx).....	100 sq ft
Weight (Approx) .....	90 lbs
Thickness (Nominal).....	4 mm; 160 mils
Roll Size .....	32'10" x 39 3/8" (10m x 1m)
Rolls/Pallet.....	20

### APPLICABLE STANDARDS

- ASTM D6222; Table 2
- Miami Dade Code Compliance
- Factory Mutual Approved
- UL Classified for use in class A, B or C roofs, as listed the latest UL “Roofing Materials and Systems Directory”
- ICC ESR-2018
- Florida Building Code
- TDI

### PRODUCT WARRANTY

Polyglass U.S.A., Inc. commercial roofing membranes can be backed with a manufacturer’s warranty for up to 20 years when used as part of an approved, multi-ply roofing system. Please see your Polyglass U.S.A., Inc. Sales or Technical Representative for specifications and details.

ADESO PRODUCTS

# POLYFLEX® SA P

## SELF-ADHERED GRANULATED CAP SHEET

### APPLICATION INSTRUCTIONS

Polyflex SA P is intended to be used as a cap sheet for new or re-roof applications as part of a multi-ply system when applied to acceptable insulations and/or coverboards for commercial and residential structures. Polyflex SA P may also be applied directly to approved wood deck substrates of non-occupied spaces such as carports, sheds, canopies, etc.

- Apply only when the weather and forecast is dry and the ambient air temperature and substrate is 40°F (5°C) and rising.
- Apply over clean, dry, dust and debris-free substrates. Prime concrete decks prior to application with PG 100 Asphalt Primer.
- When re-roofing, remove all prior roofing materials down to a clean debris-free substrate and properly close-off all abandoned roof penetrations.
- Concrete or steel decks shall be designed with proper expansion devices.
- Wood decks shall have all joints blocked and properly supported.
- Ensure the installation of Polyflex SA P does not prevent the ventilation of existing construction.
- Do not apply over shingles or other granulated surface.
- While installing Polyflex SA P:
  1. Start at the low point of the roof.
  2. Unroll the material and allow to relax.
  3. Start by removing the first 18-24" of release film.
  4. Press the membrane into place with firm and even pressure. Roll the edges with a silicone hand roller to ensure complete adhesion.
  5. Gradually remove the remaining release film applying pressure from the center to the edges as you go.
  6. Position successive rolls providing a minimum 6" end lap and 4" side lap. Laps can be sealed for additional water tightness with a hot air welder.
  7. After installation of the entire roof surface, roll with an 80# split-face linoleum roller. Take care on sloped roofs by securing the roller and applicator with the appropriate safety equipment.
- Details and flashing may be installed using Polyflex SA P with a hot air welder or with PG 500 Roof Cement. Check project details for proper installation requirements.
