Technical Bulletin #2012-01

TO: All POLYGLASS Users

CC: POLYGLASS Sales & Technical Services

Date: June 19, 2012

Author: Steven C. Wadding RRC,RRO,CDT
National Technical Services Manager

RE: Polyglass Branded Cold Process Adhesives

In support of our efforts to expand uses for all Polyglass branded products, additional fire testing executed at UL offers users the latitude to use Polyglass branded cold adhesives PolyPlus 35 and PG350 as direct substitutes in any cold process fire rating assembly as shown in our listings under R14571.

The use of Alco's #269 would remain applicable to obtain a fire classification, however, Polyglass will not support the use of the Alco adhesive for completed work requiring manufacturer's warranties.

Special circumstances and questions should be addressed to POLYGLASS Technical Services Department.
