# ELASTOSHIELD® TS G FR SBS (ELASTOMERIC) GRANULATED CAP SHEET

## **PRODUCT DESCRIPTION**

Elastoshield TS G is an SBS (elastomeric) modified bitumen membrane with fire retardant additives, for use as the primary weathering surface in low-slope roofing. This durable granulated cap sheet is reinforced with a non-woven polyester mat which ensures flexibility and dimensional stability as well as superior tear and puncture resistance. The proprietary SBS compound offers excellent waterproofing and weathering physical properties. Elastoshield TS G FR is configured with a sand backing for hot mop or cold process applications or a burn-off film for heat welded applications.

Elastoshield TS G FR membrane can be used as part of a Polyglass warranted multiply system when combined with Elastoshield TS or other approved Polyglass base/interply membranes.

## **TYPICAL APPLICATIONS**

- Premium cap sheet for low-slope multi-ply systems.
- Applied directly over an acceptable substrate or as part of a multi-ply system.
- New roofing, re-roofing, re-cover and for flashing details.

## FEATURES AND BENEFITS

- High quality SBS compound for exceptional long-term weathering performance.
- Non-woven polyester mat for superior puncture and tear resistance.
- Robust thickness for added durability.

# **TECHNICAL DESCRIPTION\***

Physical Properties	ASTM Method	ASTM Value	Typical Performance
Peak Load at 73°F [23°C]	D5147	50 lbf/in [8.8 kN/m]	87.9 lbf/in [15.4 kN/m] - MD 51.4 lbf/in [ 9.0 kN/m] - XMD
Elongation at Peak Load at 73°F [23°C]	D5147	35%	57% - MD 62% - XMD
Ultimate Elongation at 73°F [23°C]	D5147	38%	75% - MD 94% - XMD
Tear Strength at 73°F [23°C]	D5147	55 lbf [246 N]	1 25 lbf [556 N] - MD 79.4 lbf [353 N] - XMD
Low Temperature Flexibility [maximum]	D5147	0°F [-18°C]	-22°F [-30°C]
Dimensional Stability, max %	D5147	1.00%	0% - MD 0 % - XMD
Compound Stability [pass/fail]	D5147	215°F [102°C]	Pass
Granule Embedment [maximum loss]	D5147	2 g	1.5 g

# **AVAILABLE COLORS**

White (WH)

#### **PRODUCT DATA\*\***

Coverage (Approx) 100 sq ft (9.3 m <sup>2</sup> )
Weight (Approx) 108 lbs (49.2 kg)
Thickness (Nominal) 180 mils (4.5 mm)
Roll Size $32'10'' \times 39^{3}$ %" (10 m × 1 m)
Rolls/Pallet20
* * All values are nominal at time of manufacturing

#### **APPLICABLE STANDARDS**

- ASTM D6164, Type I, Grade G
- UL Classified
- FM Approved
- ICC ESR-2018
- Texas Department of Insurance
- Florida Building Code
- Miami-Dade County Approved

#### **PRODUCT CODES**

- ESF45WHS (Granule/Sand)
- ESF45WHP (Granule/Film)

# **ELASTOSHIELD® TS G FR** SBS (ELASTOMERIC) GRANULATED CAP SHEET

# **APPLICATION INSTRUCTIONS**

Elastoshield TS G FR is intended to be used as the primary weathering surface in new or re-roof applications. Elastoshield TS G FR is to be applied as the uppermost layer of a multi-ply roof system applied over a compatible Polyglass base or interply membrane. Elastoshield TS G FR may be applied directly to certain non-combustible substrates.

- Apply over clean, dry, dust and debris-free substrates. Prime concrete decks and required substrates prior to application with PG 100 Fast-Drying Asphalt Primer. Consult Polyglass Technical Service if alternate primer is allowed.
- When re-roofing, remove all prior roofing materials down to a clean debris-free substrate and properly close-off all abandoned roof penetrations.
- Concrete or steel decks shall be designed with proper expansion devices.
- Wood decks shall have all joints blocked and properly supported.
- Ensure the fire rating of the assembly over any combustible substrate.
- Ensure the installation of Elastoshield TS G FR does not prevent the ventilation of existing construction.
- Do not apply over shingles or any granulated surface.
- While installing Elastoshield TS G FR:
  - 1. Start at the low point of the roof.
  - 2. Unroll the material and allow to relax then re-roll the membrane once relaxed.
  - Install in a solid mopping of Type III or Type IV asphalt, PG 350 Mod Bit Adhesive, or fully torch the burnoff film creating a pool of asphalt. Pay close attention to the sidelap.
  - Position successive rolls providing a minimum 6" end lap and 3" side lap. Asphalt bleed out shall be ¼" to ¾" on all seams.
  - 5. Matching loose granules may be sprinkled onto the bleed out.
- Details and flashing may be installed using hot asphalt or cold application techniques. Check project details for proper installation requirements.
- For detailed drawings and recommended installation procedures of typical roof segments, such as drip edge and T-joint conditions, please refer to our website at, www.polyglass.us
