POLYANCHOR®
HIGH PERFORMANCE SYNTHETIC ANCHOR SHEET

PRODUCT DESCRIPTION
PolyAnchor is a premium, synthetic anchor membrane developed for both light commercial and residential use. Balancing strength and weight, PolyAnchor is specially designed to be used as an anchor sheet in low slope applications under Polyglass self-adhered membranes.

Woven of heavyweight polymer fabric, PolyAnchor offers superior durability, skid resistance, and a wrinkle free surface resistant to UV breakdown. PolyAnchor can serve as a suitable anchor sheet for a variety of substrates.

TYPICAL APPLICATIONS
• As anchor sheet for Polyglass self-adhered, multi-ply systems

FEATURES AND BENEFITS
• Skid-resistant polymer coating and proprietary walking surface
• Resistant to tearing and stretching around fasteners
• Lighter than most base sheets and easier to handle during all stages of installation
• Superior lay-flat properties
• Water resistance

PRODUCT DATA
Coverage (Approx) ............... 1000 sq ft
Weight (Approx) ................... 34 lbs
Roll Size .......................... 250’ x 48”
Rolls/Pallet ....................... 20

APPLICABLE STANDARDS
• ASTM D226, Type I
• UL Classified for use in Class A, B & C roofs, as listed in the latest UL “Roofing Materials and Systems Directory”
• Miami Dade Code Compliance
• ICC ESR-2018

PRODUCT WARRANTY
Polyglass U.S.A., Inc. commercial roofing membranes can be backed with a manufacturer’s warranty for up to 20 years when used as part of an approved, multi-ply roofing system. Please see your Polyglass U.S.A., Inc. Sales or Technical Representative for specifications and details.

APPLICATION INSTRUCTIONS

• Ensure the roof deck or substrate is properly fastened, has no significant delamination, warpage, bowing or separation from the rafters, trusses or support structures and is free of debris, clean and smooth before PolyAnchor is applied. Roof deck shall be sloped to be free of standing water.

• As with all roofing materials, always observe safe roofing practices (OSHA) and local building and safety codes.

• PolyAnchor shall be laid loosely on the deck with minimum 3 inch side laps and 6 inch end laps.

• PolyAnchor is a water shedding membrane and is not intended to be utilized as stand-alone membrane or left exposed to the weather on slopes of less than 4/12. PolyAnchor is specifically designed as an anchor sheet below a subsequently installed Polyglass self-adhesive membrane or Polystick underlayment.

• Fasteners shall be corrosive-resistant roof nails. Fasteners shall be a ring-shank “simplex” type nail with a minimum of 7/8 inch square or round head. Fasteners shall be placed in the designated location provided for on the PolyAnchor membrane or an otherwise provided by Polyglass for the project conditions.

• Use of PolyAnchor on low-sloped roof conditions 0.25/12 slope to 2/12 slope, PolyAnchor can be installed in a single layer application and lapped as stated above. The PolyAnchor is to be immediately covered with the subsequent Polyglass self-adhesive membrane(s) the same work day.

• For special or other project conditions not provided for by the above, contact Polyglass Technical Services.
