

## PROJECT REFERENCE

### Honolulu International Airport Hawaii, U.S.A. Commercial

Certified Construction opted to re-roof the 250,000 square foot airport with Polyglass' Elastoflex® SA V and SA P three-ply, built-up roof system. Elastoflex® SA V and SA P are premium self-adhesive roofing membranes with ADESO® technology. The membranes provide a simple, safe and economical roof installation. Eliminating the need for torching and mopping, Elastoflex® membranes provide strength, weathering resistance and waterproofing performance.

#### Products:

- Elastoflex® SA P (SBS)
- Elastoflex® SA V (SBS)
