

## PROJECT REFERENCE

### Island Home In Maine

#### Maine, U.S.A.

#### Residential

Situated on a small, isolated island off the eastern coast of Maine, this home is in a town only accessible via a small number of ferryboats coming from the mainland. The homeowner had the building re-roofed with a rolled roofing product that was sold through a nearby building products distributor. Unfortunately, the rolled roofing material was faulty and quickly began leaking.

The homeowner contacted C.W. Conway & Sons Builders Inc. to help her find a more reliable and long-term solution to her roofing dilemma. Conway recommended Elastoflex® SA V and Elastoflex® SA P, self-adhesive modified bitumen membranes featuring patented ADESO® Technology.

#### Products:

- Elastoflex® SA V Base Sheet (SBS)
- Elastoflex® SA P Cap Sheet (APP)
