

PROJECT REFERENCE

New York Bank Headquarters New York, U.S.A. Commercial

Roof Pro came up with a plan to repair the leaks, tear off the old roof systems and install a new roof. Roof Pro worked with bank management to design the new roof system, which featured a self-adhered SBS modified bitumen system from Polyglass®. The roof system consists of two plies of Elastoflex® SA V base sheet and a white, self-adhered cap sheet, Elastoflex® SA P.

Products:

- Elastoflex® SA V Base Sheet (SBS)
- Elastoflex® SA P Cap Sheet (SBS)
