

## PROJECT REFERENCE

### **Warehouse/Office Building Project Alaska, U.S.A.**

#### **Commercial**

The warehouse building was flat with an awning in the back displaying a 2:12 pitch. The office section was in the front of the building and the main section of the warehouse had 20-foot open ceilings. It was a large installation that needed to finish on tight deadlines.

The contractor installed Polyglass' Polyflex<sup>®</sup>, an APP torch down modified base sheet and Polyflex<sup>®</sup> G cap sheet over the existing membrane. Though not required, the crew covered the membrane with an aluminum coating. The coating enhanced the roofing system with extra protection.

#### **Products:**

- Polyflex<sup>®</sup> (APP)
- Polyflex<sup>®</sup> G Cap Sheet (APP)
