

# Landings at Boot Ranch

Residential - Florida, U.S.A.

**Polystick® MTS PLUS** - Self-Adhered High Temperature Underlayment

**Polystick® TU PLUS** - Self-Adhered High Temperature Roof Underlayment

**WB 3000** - Fast-Drying, Water-Based Primer

220,000 ft<sup>2</sup> over wood

Installed by Quality Roofing, Inc.

2017

Polyglass' two-ply self-adhered underlayment waterproofing system was installed by Quality Roofing, Inc. on three-story luxury apartments in Palm Harbor, Florida. The 220,000 square foot re-roof included Polystick® MTS and Polystick® TU Plus high temperature underlayments beneath concrete tiles. Polyglass' WB-3000, fast-drying, low VOC primer, was used to enhance the adhesion of the underlayments to the wooden deck. The Landings at Boot Ranch apartments are now covered by a 30-year warranted waterproof system.
