

# Lynnwood Senior Living

Commercial - Washington, U.S.A.

**Elastoflex SA V** - Self-Adhered SBS Roof Membrane

**Polyflex®** - APP Base/Interply Sheet

**Polyflex® G** - APP Granulated Cap Sheet

50,000 ft<sup>2</sup>

Installed by 3-D Roof Systems

2017

Roofing Contractor 3-D Roof Systems installed a vegetative roof atop the Senior Housing property.

Backed by a 30-year warranty, the three-ply modified bitumen system chosen provides the critical waterproofing needed for a vegetative roof assembly.

The system was built with two layers of Polyglass' Polyflex® smooth APP modified bitumen membrane and finished with Polyflex® G APP granulated cap sheet in white. Elastoflex SA V self-adhered SBS roof membrane was used for the flashing details.
