

Joseph Caleb Daycare Center

Commercial - Florida, U.S.A.

Elastoflex SA V - Self-Adhered SBS Roof Membrane

Polyfresko® G SA - Highly Reflective White Self-Adhered APP Cap Sheet

20,000 ft²

Installed by Florida Building Supply

2017

Joseph Caleb Daycare, an early childhood education center in Miami, received a new self-adhered, modified bitumen roof system installed by Florida Building & Supply. The three-ply system was built with Elastoflex SA V for base and interply sheets, and Polyfresko G SA highly reflective white cap sheet. This system features Polyglass' CURE Technology®, which provided the required energy ratings; and ADESO® Technology, which allowed the daycare center to remain open during the roofing project.
