

Hyatt House Miami Airport Hotel

Commercial - Florida, U.S.A.

Polystick® XFR - Fire Resistant Self-Adhered Roof Underlayment

30,000 ft²

Installed by Maxx Leverage Roofing & Restoration
2022

Maxx Leverage contractor and long-time Polyglass customer, James Moore, was so impressed with Polyglass' Polystick XFR roof underlayment's innovative qualities he chose to use it for his next big project in Miami,

FL: the Hyatt House Miami Airport Hotel in South Miami, Florida, requiring over 30,000 square feet of new roof underlayment. A perfect opportunity to put Polyglass' dual-purpose, fire-resistant, and self-adhered waterproofing underlayment to the test.

"XFR was selected for the advanced Burn-Shield Technology™ with maximum fire-resistance properties delivered in one single layer installed as part of the metal roof assembly (unlike conventional fire barrier systems requiring a secondary fire barrier to achieve the UL Class A Fire Rating for Combustible Decks). Polystick XFR qualifies for up to a 30-year warranty backed by the Polyglass protection guarantee."

- John Massengill – Independent Sales Representative for Polyglass
