POLYGLASS[®]

**Granule-free side lap
self-adhered modified
bitumen cap sheets**

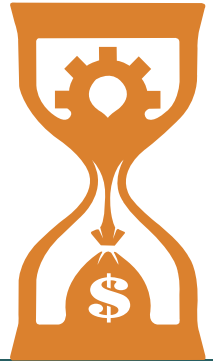

SEALLap® ULTRA

Instant side lap bond, tested stronger than all other application methods. This bond forms a completely monolithic water-tight seal for long-term performance; by way of applying the same self-adhesive compound on the side lap of the membrane as on the bottom layer.

SA to SA bond of SEALLap ULTRA has many benefits:

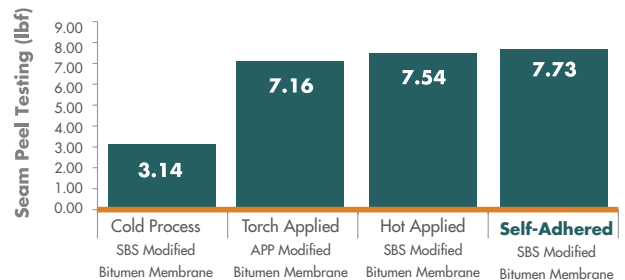

- Labor and time savings
- More efficient and less costly installation
- Instant side lap bond
- Monolithic seal
- Cleaner application
- Safe, no open flame application
- Superior watertight sealing

Save on labor cost with **SEALLap ULTRA**... The Ultimate Roofing Solution!

By applying self-adhesive compound in the granule-free side lap, as well as the bottom layer, ADESO® Self-Adhered modified bitumen membranes now offer a side-lap with greater shear strength than any other mod-bit roofing assembly. SEALLap ULTRA out performs torch, mop, cold process or any other non-Polyglass self-adhered roofing membrane.

Guaranteed strongest shear strength at the side

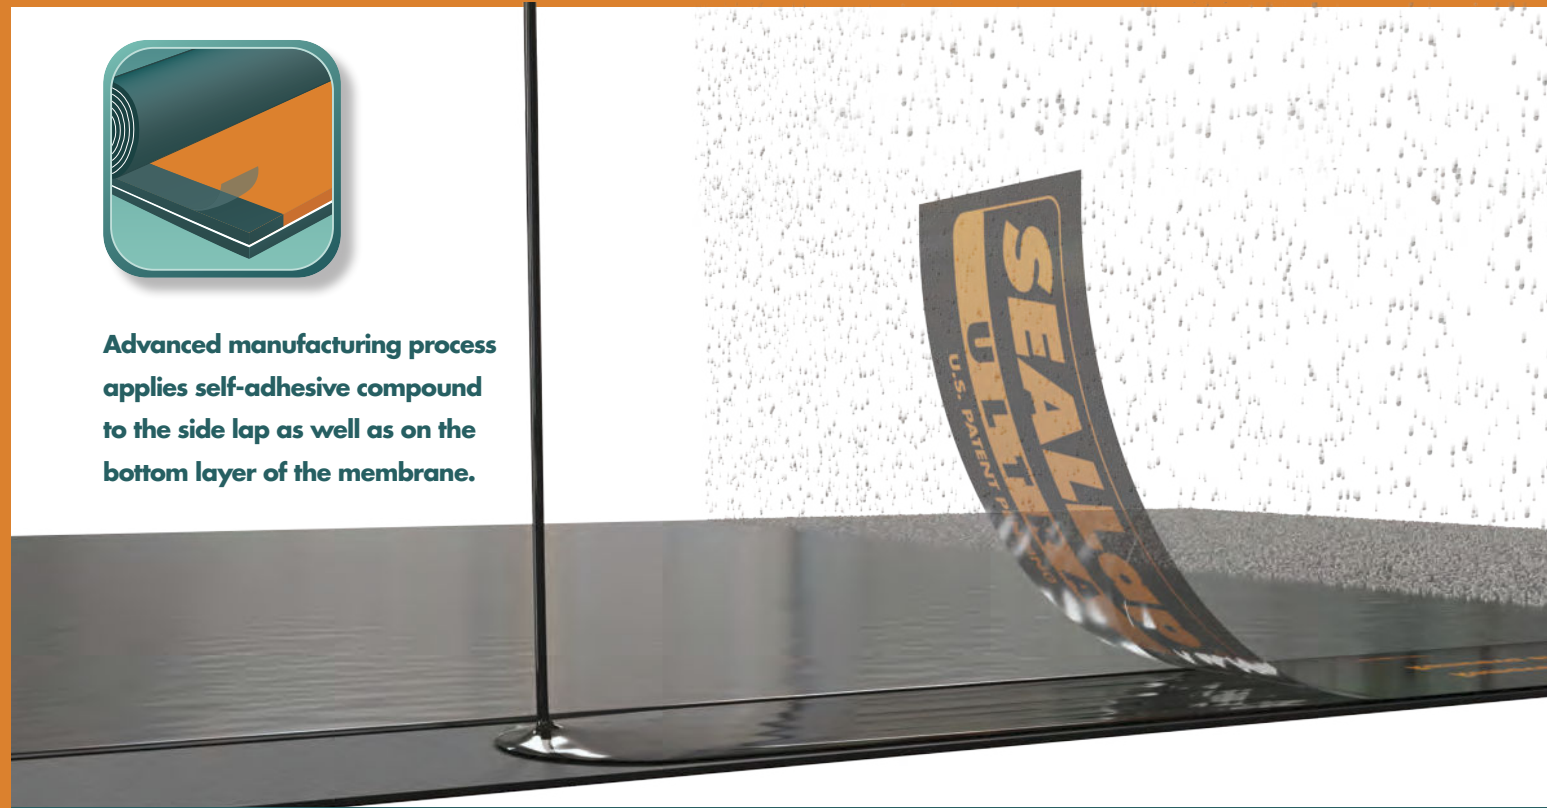

Why use Polyglass' granulated Self-Adhered cap sheets featuring SEALLap ULTRA?

SEALLap[®]
U L T R A

U.S. PATENT PENDING

Advanced manufacturing process applies self-adhesive compound to the side lap as well as on the bottom layer of the membrane.
