*Approved as part of a multi-ply system with mechanically fastened prepared roof coverings only. Tile applications only.

All Polystick underlayments meet or exceed industry code approvals, and Polystick TU PLUS features up to 12 month exposure (mechanically attached roof covering). Up to 6 month exposure (adhesive set roof covering). Refer to local codes, listings, or requirements of the AHJ. Codes supersede Polyglass requirements and recommendations. Florida Building Code Approval for exposure beyond 6 months is pending.

Why Use Polyglass Polystick Self-Adhered Underlayments?

When selecting a roof assembly to install, a Polyglass roof underlayment can play a critical role in the performance of the roof system. Provide your customers with the most technically advanced and time and weather tested underlayment products on the market.

- ADESO® Self-Adhered Dual-Compound Technology
- Split-release film/paper for ease of installation
- Nail seal-ability
- Patented SEALLap® on select underlayments, a factory-applied adhesive treatment along the side lap
- Surfaces engineered for superior slip resistance and long-term performance
- Warranty up to 30 years
- Safe: no flames, fumes or odors
- Increased labor efficiency and roof dry-in speed

Service & Support

Polyglass provides service and support when you need it. Our team of experts assist customers from concept to completion with each phase of the project. We provide consistent communication and technical support, to expedite the process, keeping your projects on time and on budget.
