

Samaritan Center Commercial Austin, Texas

Polystick® MTS Plus
Self-Adhered Multi-Purpose High Temp Underlayment

6,000 ft²
Installed by Wilson Roofing
2024

The Samaritan Center, a nonprofit based in Austin, Texas, has been a pillar of mental health support and wellness education since 1974. When the aging 6,000-square-foot roof at the Samaritan Center began to fail, its replacement required expert craftsmanship and proven materials.

Upon evaluating the roof, Wilson Roofing discovered the existing system relied on a #30 felt underlayment. Wilson Roofing partnered with Polyglass USA to identify the optimal product for the project. After a thorough assessment, they selected Polystick® MTS Plus, a self-adhered, high-temperature waterproofing underlayment.

The installation process was seamless, thanks to Polystick MTS Plus's high temperature resistance and Wilson Roofing's expertise. The result is a durable, water-tight roof that ensures the Samaritan Center can continue its vital work for years to come.
