POLYGLASS SOLUTIONS SUPPORTING FORTIFIED ROOF™ SYSTEMS

Polyglass is proud to offer products that comply with the FORTIFIED™ standard, reflecting our ongoing commitment to high-performance solutions that support durable, reliable roofing systems.

What is the FORTIFIED program?

Developed by the Insurance Institute for Business & Home Safety (IBHS), FORTIFIED Roof™ is the national standard for storm-ready construction, helping homes and buildings withstand high winds, hail, and heavy rains. Polyglass roofing systems are qualified for use in FORTIFIED Roof projects, providing contractors and homeowners with trusted materials for lasting protection that exceed code requirements.

The collaboration between Polyglass and the FORTIFIED program by IBHS represents a powerful alignment between innovative product performance and proven building science.

Our compliant underlayments and roofing systems support the FORTIFIED Roof standard by offering:

- High wind resistance with durable self-adhered systems
- Moisture protection through superior sealing performance
- Performance that surpasses traditional roofing methods and codes requirements

The FORTIFIED and Polyglass Collaboration Key Benefits:

- Contractors have easy access to FORTIFIED-compliant materials
- Homeowners benefit from proven protection installed with certified best practices
- Promotes the industry to continue evolving toward resilience-first construction
- Empowers municipalities and developers to build for long-term durability
- Help contractors to educate clients and grow their resilience-focused offerings
- Ensure homeowners invest in protection, peace of mind, and insurance savings
