

MAPEPLAN® P CORNER

PREFABRICATED PVC FLASHING CORNERS

PRODUCT DESCRIPTION

Mapeplan P Corners are prefabricated PVC inside and outside corners designed to provide watertight protection at inside and outside wall transitions in PVC roofing systems. Each corner is factory fabricated and hand-welded in a controlled environment to ensure consistent quality and performance. The use of prefabricated corners helps reduce field fabrication time and supports more efficient installation. Compatible with Mapeplan PVC membranes, Mapeplan P Corners provide the same long term durability performances.

TYPICAL APPLICATIONS

- Inside wall-to-wall flashing transitions
- Outside wall-to-wall flashing transitions
- Parapet corner conditions
- Repairs at existing corner flashing conditions

FEATURES AND BENEFITS

- Factory-fabricated for consistent quality
- Hand-welded construction
- Helps reduce field fabrication time
- Supports faster and more consistent installation
- Manufactured from durable 60-mil PVC
- Custom configurations available upon request

STANDARD CONFIGURATIONS

	Height	Width	Flange
Inside Corner	6"	6"	n/a
Outside Corner	6"	6"	6"

AVAILABLE COLORS

White (WH) Grey (GR) Tan (TA)

APPLICATION INSTRUCTIONS

1. Install in accordance with Polyglass Technical Specifications.
2. Clean the PVC membrane in the area to receive the flashing using MEK or acetone. Allow the solvent to flash off completely before installation.
3. Position the prefabricated inside or outside corner at the flashing transition and align the flange (if present) on the membrane surface.
4. Heat weld the Mapeplan P Corner to the membrane using a hand welder and silicone roller. Ensure a continuous, watertight weld along all flange edges.
5. Roll all welds with a silicone roller to ensure proper adhesion and a continuous bond.

PRODUCT DATA

8 pcs/carton
48 cartons/pallet

PRODUCT CODES

Inside Corner

- 84997036 – White
- 84997037 – Tan
- 84997038 – Grey

Outside Corner

- 84997033 – White
- 84997034 – Tan
- 84997035 – Grey
