

MAPESEAL® GC MAPEPROOF® LIQUID MEMBRANE MAPEDRAIN®

PLANTERS & OVERBURDEN ASSEMBLIES IN BALCONIES AND TERRACES

SYSTEM OVERVIEW

The **Mapeseal® GC + Mapeproof® Liquid Membrane** system is a fully adhered, liquid-applied waterproofing solution designed for multiple application conditions commonly found on the same project.

It can be used for **overburden assemblies**, such as tiled balconies and terraces, and for **planter areas**, where **Mapedrain®** is incorporated when drainage and backfill protection is required. This allows contractors to address different assembly needs across a single property using a coordinated set of products.

A SEAMLESS SYSTEM FOR OVERBURDEN ASSEMBLIES & PLANTERS

PRIMARY APPLICATIONS

Ideal for projects that require reliable waterproofing across both horizontal and vertical structures.

Overburden Assemblies

WHY IT WORKS

- Seamless protection
- Versatility across applications
- Designed for challenging waterproofing conditions

Planter Areas

PLANTERS & OVERBURDEN ASSEMBLIES IN BALCONIES AND TERRACES

HOW THE SYSTEM COMES TOGETHER

The Mapeseal GC + Mapeproof Liquid Membrane system is designed as a **coordinated waterproofing assembly**, allowing continuous protection across planters, overburden assemblies, and transition areas.

For full technical data, approvals, limitations, and installation requirements, refer to official product documentation and technical data sheets.

SYSTEM COMPONENTS

Mapeseal® CG

Primary single-component waterproofing membrane forming the continuous base of the system.

- Suitable for green concrete
- Applies easily with no mixing
- No primer required
- Can be applied in a variety of thicknesses
- Very low odor, solvent-free

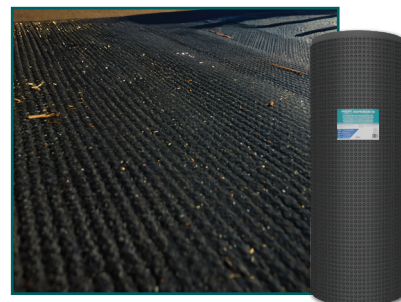

MIAMI-DADE COUNTY
APPROVED

Mapeproof® Liquid Membrane

Required liquid membrane used to reinforce details and transitions throughout the assembly.

- Ideal for fillets, penetrations, repairs, and transitions
- Cold-applied, chemical cure
- Extended working time for executing complex details
- Available in both 4 gal and 1.25 gal pail configurations

Mapedrain® (optional)

Drainage and protection layer used to relieve water pressure and protect the waterproofing membrane.

- Lightweight, easy to install
- Serves as a protection course for waterproofing membranes
- Prevents the passage of soil or sand particles which might clog the polypropylene core
